

## PRO-BIOTICS PLUS ® STICK PACKS

With L.E.A.D.S. ®  
Live Enzyme Activated Delivery System®

**FACT: You need 2-3 pounds of beneficial bacteria in your gut to support good digestion and normal intestinal health!**

**Pro-Biotics Plus® Stick Packs, our highest CFU probiotic yet. Support your intestinal health while supporting a healthy immune system.**

- **40 billion live stable pro-biotics per delicious stick pack**
- **12 stabilized live strains**
- **Pre-biotics**
- **Our exclusive L.E.A.D.S.® Live Enzyme Activated Delivery System®**
- **Natural raspberry fruit flavor**
- **Full adult dose in an individual stick pack that can be used at home or on the go**

**Pro-Biotics** are organisms and substances that help improve the environment of the intestinal tract. These organisms produce acids (such as acetic acid and lactic acid) and other compounds, which inhibit the growth of "bad" bacteria and promote "good" intestinal flora. Science supports that an important first line of defense in immunity is intestinal flora. Consulting with Dr Khem Shahani, NWC included twelve different stabilized strains of "good guy" bacteria in this formula, specifically chosen for their special benefits to the immune system and digestive tract. Along with preventing infective organisms from gaining a foothold in the GI tract, these strains of bacteria also enhance the activity of immune cells.

Unfortunately, every time we drink carbonated beverages, chlorinated water, coffee and alcohol, eat fatty foods, get stressed or become overly tired, we unknowingly kill the good bacteria in our bodies. Even the foods we eat to keep healthy, like meat, poultry and milk, often contain antibiotics that further reduce the levels of good bacteria. For most Americans, this means every day we negatively influence our bodies' ability to stay healthy.

### **Probiotics:**

**Boost the immune system**

**Improve digestion**

**Support nutrient absorption**

**Remove toxins from the body**

**Help manufacture B-vitamins**

**Promote proper elimination**

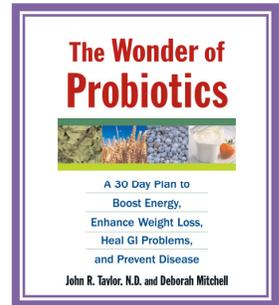

**Facilitate normal iron absorption**

**NWC delivers a delicious powder with 12 stabilized strains of probiotics!**

**PRO-BIOTICS PLUS ® STICK PACKS** are specially formulated with an astounding 12 species of stabilized probiotics, instead of the usual 1 – 2 forms provided in most other products. It also contains **over 40 billion CFUs** (colony forming units) for maximum protection. To insure that you get 40 billion CFUs in each stick pack we actually make the product with more than that.

**PRO-BIOTICS PLUS® STICK PACKS** are safe and contain only the highest quality ingredients with the strictest manufacturing standards to ensure purity and efficacy without a high cost to you. It is safe, all natural and there are no side effects. As an added benefit, **PRO-BIOTICS PLUS® STICK PACKS** also contains Chelated zinc known for its ability to further support good immunity.

**NWC Inc. utilizes probiotics researched and developed by Dr. Khem Shahani and is formulated by the author of the book “The Wonder of Probiotics” John R Taylor ND**

## Ingredient Overview

Acidophilus DDS-1 strain - researched and developed by Dr. Khem Shahani over 77 years ago, has been, and still is, the most effective probiotic strain. Acidophilus defends against the greatest number of pathogens, inhibiting the growth of bad bacteria. Called the “sticker strain,” Acidophilus has the ability to actually cling to the intestinal wall without harming it. In fact, it is best known for its ability to move undisrupted through the stomach and into the intestines where it eats away at harmful bacteria. It is known for reducing the occurrence of occasional constipation and diarrhea, increasing nutrient uptake (especially calcium) and supporting healthy skin conditions.

B. bifidum - is normally found in the mucus membrane lining of the large intestine and vaginal tract, where it attaches to the walls, removing yeast that would further lower the pH levels and allow bacteria to grow. Supplementation has been shown to modify intestinal flora, support healthy liver function and protect against the damaging effects of radiation. It also helps control occasional diarrhea and other intestinal disturbances.

B. infantis - normalizes inflammation in the gastrointestinal tract and can crowd out some strains of E. coli. According to the Journal of Applied Bacteriology, B. infantis is part of an important group of microorganisms, which are considered to exert a range of biological activities related to human health. This particular strain of probiotic has also been shown to produce compounds useful toward supporting intestinal health.

Supplement Facts		
Serving Size: One Stick Pack (3 Grams)		
Servings per container: 30		
Amount per serving		% D.V.
Zinc (as Zinc bis-glycinate chelate)	15mg	100%
NWC Naturals® Proprietary Pro-Biotics Blend L. acidophilus DDS-1, L. Casei, L. Gasseri, L. Plantarum, L. Reuteri, L. Rhamnosus, L. Salivarius, Lactococcus Lactis, B. Lactis, B. Longum, B. Infantis, S. Thermophilus.	40 billion CFUs	◇*
FOS (Fructooligosaccharides)	555mg	*
L.E.A.D.S.® (Protease 6.0, Protease 3.0, Protease 4.5, Peptidase, Amylase, Alpha-Galactosidase, Beta- Glucanase, Diastase, Lipase, Cellulase, Pectinase, Phytase, Hemicellulase, Bromelain, Lactase, Glucosylase)	30mg	*

**Other Ingredients:** Reduced Cane Juice, Beet Root Juice Powder, Natural Raspberry Flavor, Citric Acid, Calcium Silicate, Natural Vanilla Flavor, Natural Flavors, Organic Tapioca Starch.  
◇ Probiotic CFUs at time of manufacture. 100% live stable probiotics researched and developed by Dr Khem Shahani. To maintain higher potency store in the refrigerator.  
All Chelated Minerals are Albion TRAACS®

**B. longum** - aids in the cleansing and health of the colon and liver. It is also known for supporting normal breast health.

**L. casei** - is reported to be one of the most potent defenders from Listeria bacteria. It is also known for its ability to induce an immune response that is helpful in supporting a healthy urinary tract.

**L. plantarum** - can be found in naturally fermented foods. In your body it is found in the large intestine where it helps to break down protein into usable nutrients, thus normalizing inflammation.

**L. rhamnosus** - is one of the more highly studied probiotic strains, primarily used in support of normal gastrointestinal health. It also aids the body in balancing the normal flora ecology and supports a healthy urinary tract.

**L. salivarius** - has been shown through research to produce a high amount of lactic acid, which can inhibit the growth of H. pylori bacteria.

**Streptococcus thermophilus** - is known for repairing free radical damage from aging, stress, antibiotics, chlorinated water and other chemicals. It also contains an antioxidant that helps normalize inflammation and protect against the toxins present in the Standard American Diet.

**Zinc** - serves many functions, including acting as a constituent to at least 25 enzymes involved in digestion and metabolism. Research indicates that the health of the body's natural killer cells may be dependent on zinc intake for normal growth and development. Zinc is very important for proper function of the thymus gland and thymus hormones, as well as cellular immunity.

### Prebiotics - Inulin FOS

**(Fructooligosaccharides)** – is one of the best-known prebiotics. FOS is a class of simple carbohydrates found naturally in certain plants, such as Jerusalem artichokes, onions and bananas. It is known to promote the growth of beneficial bacteria in the gastrointestinal tract and has been shown to stimulate growth of Bifidobacterium in the colon, facilitating good colonization. Supplementing with FOS can greatly increase metabolic activity in the colon and help relieve constipation and reduce the production of intestinal putrefactive substances. Healthy colon function is vital to a properly functioning immune system.

### Live Enzyme Activated Delivery System® (L.E.A.D.S. ®) –

Like all of NWC's products Pro-Biotics Plus® contains our exclusive Live Enzyme Activated Delivery System®. It is NWC's delivery system that guarantees assimilation and utilization of the nutrients at the cellular level. **L.E.A.D.S. ®** is a proprietary system of adding a blend of select enzymes to botanical and whole-food products for the purpose of improving the release and absorption of nutrients contained in these products. This special blend of supplemental enzymes works to extract the nutrients from the formula in the most bioavailable form so the body can use them easily and efficiently. The **L.E.A.D.S. ®** enzyme delivery system is formulated to match the specific needs of each individual product made by NWC Naturals Inc. and is based on a unique and proprietary method. It is especially beneficial with products providing a whole-food source of vitamins and minerals.

# QUESTIONS?

## 1. Are the PRO-BIOTICS PLUS ® STICK PACKS just for kids?

No. These are the most powerful high colony forming unit probiotics in the world with 40 Billion CFUs of 12 different strains of good guy bacteria. However, kids do love the delicious fruit flavor of this product that is essential in supporting their young susceptible immune systems.

## 2. What type of research is behind the PRO-BIOTICS PLUS ® STICK PACKS formula?

PRO-BIOTICS PLUS ® STICK PACKS combines the latest research and clinical studies into one powerful formula. The probiotics in this formula were selected after consulting with Dr. Khem Shahani from the University of Nebraska. Dr. Shahani was recognized as the world's foremost authority on beneficial bacteria supplementation and was a pioneer in the discovery of DDS-1 Acidophilus.

## 3. Does PRO-BIOTICS PLUS ® STICK PACKS taste bad?

**PRO-BIOTICS PLUS ® STICK PACKS** tastes great! It is flavored with natural sweeteners and a natural raspberry fruit flavoring. Stir into a juice, add to yogurt, add to a smoothie or consume it right from the package. Children will love the taste.

## 4. Are there any side effects?

**PRO-BIOTICS PLUS ® STICK PACKS** has no known side effects.

## 5. If I am on medication, can I safely use this formula?

It is safe to take **PRO-BIOTICS PLUS ® STICK PACKS** along with medication. There are no known drug interactions and the ingredients do not alter the action of any medications. In fact, since antibiotics can actually wreak havoc on your body's immune system, taking probiotics along with medications can positively affect your health.

## 6. If I already take the Pro-Biotics Plus ® capsule formula, do I need to take this one too?

Most people who take the Probiotics-Plus® capsule formula can use this stick pack formula as well to further support good intestinal health. The stick pack formula was specially designed to help quickly re-establish the beneficial bacteria in the intestines with 12 strains, thereby increasing the uptake and absorption of nutrients from food into the body.

## 7. I already take a multivitamin, why take this formula in addition?

Multivitamins provide general nutritional support to the body, but only, if you have enough good bacteria in your body to allow for absorption. **PRO-BIOTICS PLUS ® STICK PACKS** uses 12 strains of probiotics to help clean your system of toxins and improve nutrient absorption.

## 8. I heard that you should not take immune boosters daily. Is that true?

**PRO-BIOTICS PLUS ® STICK PACKS** does not work like your typical herbal immune booster. It works by cleaning out the toxins and other material in the intestines that have been left behind by failed digestion. In doing this, it reestablishes the pH balance, allowing your body to once again become healthy and operate normally.

## 9. Can I give PRO-BIOTICS PLUS ® STICK PACKS to my children?

This formula is safe for most people. For children less than 8 years of age use half the recommended adult dose. Check with a pediatrician before administering to a child of 3 years or younger.

## 10. I am pregnant /nursing. Can I safely use this formula?

**PRO-BIOTICS PLUS ® STICK PACKS** is safe. However, you should always check with your doctor before beginning any supplementation program if you are pregnant or nursing.

## 11. If I have an autoimmune disease can I still take PRO PRO-BIOTICS PLUS ® STICK PACKS?

This formulation is safe to take, has no side effects and it positively impacts the affects of prescribed medications. It can greatly enhance a depressed immune system; however, you should consult your physician before beginning any supplement program when suffering from a chronic condition or disease.

## 12. I am allergic to yeast and gluten, can I take this formula?

**PRO-BIOTICS PLUS ® STICK PACKS** contains no yeast or gluten and is non-GMO.
